

## ***Color & Quality***

**Design in the RGB color mode.**

**Bitmap files need to be 100 - 150ppi at actual size.**

Colors come out more vivid with this setting. You can design up to 300ppi.

## ***Bleed***

**Extend background images or colors to the blue line.**

Bleed is 3" on all sizes. You may need more or less material - Measure.

## ***Live Area***

**This is what the audience will see.**

**Place important text and images inside this line.**

Templet may need to be resized. Measure inside area of cabinet to the nearest 1/4"

## ***Save File***

**Convert fonts to curves or paths before saving.**

**Save as .png .jpg .pdf .tif .eps .svg**

Before saving remove the instructions & guide layers.
