#### VintageLogos.com

### **30" x 50" Templet**

# **Color & Quality** Design in the RGB color mode. Bitmap files need to be 100 - 150ppi at actual size.

Colors come out more vivid with this setting. You can design up to 300ppi.

## Bleed

### Extend background images or colors to the blue line.

Bleed is 3" on all sizes. You may need more or less material - Measure.

# Live Area

## This is what the audience will see. Place important text and images inside this line.

Templet may need to be resized. Measure inside area of cabinet to the nearest 1/4"

# Save File

Convert fonts to curves or paths before saving. Save as .png .jpg .pdf .tif .eps .svg

Before saving remove the instructions & guide layers.
