

Color & Quality

**Design in the RGB color mode.
Bitmap files need to be 100 - 150ppi at actual size.
Colors come out more vivid with this setting. You can design up to 300ppi.**

Bleed

Extend background images or colors to the blue line.

Live Area

**This is what the audience will see.
Place important text and images inside this line.**

Save File

**Convert fonts to curves or paths before saving.
Save as .png .jpg .pdf .tif .eps .svg
Before saving remove the instructions & guide layers.**
