

## *Color & Quality*

**Design in the RGB color mode.**

**Bitmap files need to be 150ppi at actual size.**

Colors come out more vivid with this setting. You can design up to 300ppi.

## *Live Area*

**This is what the audience will see.**

**Place all text and images inside this line.**

## *Save File*

***Convert fonts to curves or paths before saving.***

**Save as .png .jpg .pdf .tif .eps .svg**

Before saving remove the instructions & guide layers.
